**Answer: C,D (LEAVE A REPLY)**

#### **NEW QUESTION: 34**

Universal Containers manages internal projects by department using a custom object called projects. Only employees in the project's respective departments should have view access to all of the department's project records. If an employee changes job roles and moves to another department, the employee should no longer have access to the projects within their former department. How can these requirements be met assuming the organization wide default for projects is set to private? (Choose 2)

- A. Create a criteria-based sharing rule using the project's department that grants access to users by public groups.
- B. Create a criteria-based sharing rule using the project's department that grants access to users by profiles.
- C. Create a criteria-based sharing rule using the project's department that grants access to users by permission sets.

**D.** Create a criteria-based sharing rule using the project's department that grants access to users by roles.

**Answer:** [\(SHOW ANSWER\)](#)

#### **NEW QUESTION: 35**

Universal Containers has a workflow on opportunity that will change the status field to "In Progress" when the Stage field is changed "Negotiation." In addition, there is a validation rule on Status that will prevent the status being set to "In Progress" if the amount of the opportunity is less than \$10,000. A user named Frank does not have FLS to see status. When Frank changes opportunities to a stage of "Negotiation" the status is still being changed to "In Progress", why is this occurring?

- A.** Workflow rules cannot trigger a validation rule
- B.** Workflow rules occur after validation rules and thus override validation rules.
- C.** Field Level Security prevents the validation rule from running.

**Answer:** **A** [\(LEAVE A REPLY\)](#)

#### **NEW QUESTION: 36**

Universal Containers has a custom assessment object used by three divisions. Each division wants to track different information on the assessments, including different values for the status picklist. Division managers do not want their teams to be able to create another division's assessment. How can this be accomplished?

- A.** Create separate assessment record types for each division and use them to limit picklist values. Create separate page layouts for each record type and use profiles to restrict record type access.
- B.** Create additional custom assessment objects, one for each division, to track their assessments so information can be tracked separately. Use profiles to restrict access to the three custom objects.
- C.** Create three page layouts to determine the fields and picklist values for each user based on the division indicated on their user record. Use field-level security to restrict access to each division's fields.
- D.** Create a separate page layout for each division and assign them profiles. Use the profile setting to configure each division's custom field list and picklist values for assessments

**Answer:** **A** [\(LEAVE A REPLY\)](#)

#### **NEW QUESTION: 37**

The CRM Manager at Universal Containers has requested that a custom text field be converted to a picklist in order to promote better data hygiene. What needs to be considered before changing the field type? Choose 2 answers

- A.** All data should be backed up before converting a text field.
- B.** Changing a field type will remove existing field history.

- C. Field references will be removed in Visualforce pages
- D. Existing list views that reference the field may be deleted.

**Answer: A,D ([LEAVE A REPLY](#))**

#### **NEW QUESTION: 38**
